HISTORY

Design Matrix is an Architectural, Engineering & Urban design consultancy firm with project management skills. History of Design Matrix begins with the vision of Architect Rizwan Manzur who set up this organization in 2005 and steered it with an aim to excel in the fields of Architectural Design, Urban Design and interior design with innovation and creativity, keeping our heritage intact.

In 2007 Engr. Ahsan Manzur (Structural Engineer) joined this organization as a managing partner to strengthen the Engineering & project management department. As a company, DM is highly committed to provide best services in all types of design works with creativity and quality works. DM has also done various valuable projects under the consortium of Green Matrix.

It is an institute where design and development grow and emerged as a matrix of services.

SCOPE OF SERVICES

- ARCHITECTURAL DESIGN
- INTERIOR DESIGN
- STRUCTURAL DESIGN
- MEP DESIGN
- URBAN & TOWN PLANNING
- PROJECT/CONSTRUCTION MANAGEMENT
- TURNKEY SOLUTIONS
- MEDICAL & HEALTHCARE CONSULTANCY
- HEALTHCARE FURNITURE & EQUIPMENT SOLUTIONS
- EPC SOLUTIONS

PHILOSOPHY

DM focuses on the philosophy of green building solutions by working out the matrix of analysis regarding macro and micro climates of the particular area, building techniques, materials and its cultural relevance. We also keep in mind the client's desires, financial allocations, by using innovative means to keep the building aesthetically strong and culturally fit. It does not neglect the philosophy of form follows the function, while composing the masses, surfaces, textures, colors etc, treating architecture as state of the art piece.

GROWTH

Our experience extends across a wide spectrum of building types ranging from commercial, residential, mixed development, institutional, religious, industrial & health care. DM has also undertaken various housing projects of different income groups.

FUTURE DIRECTION

The Mega projects today require a multi disciplinary practice with experience personnel supported by the state of the art computers and information technology. We have put in place the necessary equipment and manpower to handle very large projects not only in Pakistan but also overseas. Indeed we have been commissioned by some overseas clients to carry out substantial projects in their countries on the strength of our track record and we see our involvement in overseas projects increasing in the coming years. In terms of capability of the firm it has a systematic up gradation program in all areas of its operation. We believe that it is important to prepare the firm to meet the challenges of the future.

Design Matrix
Rizwan Manzur, Architect
Ahsan Manzur, Structural Engineer
194-Y St. #13, 1st floor, Phase-III, DHA
Lahore, Pakistan

Dear Rizwan and Ahsan,

It is a great pleasure to write a reference letter for your firm, Design Matrix.

Design Matrix came into this ground-breaking project — a 23,000 square foot, co-educational school in the heart of the Hunza Valley of Gilgit-Baltistan — by stages. Design Matrix began as a construction document firm, and soon transitioned into the role of project architects in 2011, an assignment that continued through completion in September of 2018. You expanded to take on construction administration from early 2013 through 2014. In 2015, Design Matrix was asked to take on the immense responsibility of project management of the construction itself.

As a firm, you excelled in problem solving. MurtazAbad, Hunza, is a difficult area for construction in many ways and on many levels, yet Design Matrix faced each challenge with a positive attitude and determination to find the right solution.

As the Project Architect, you excelled at listening carefully to the primary stakeholders, and worked willingly with them to design architectural and civil engineering plans to reflect their goals and aspirations to make this unique project successful.

As Project Managers, you built a unified and effective on-site and in-office team of professionals, who worked with the local contractors and workers, to improve their capabilities, thus enabling them to grow and improve their prospects for more challenging work and greater rewards. Along the way, Design Matrix itself grew as a firm and today is considered to be a multi-talented firm capable of undertaking large, sophisticated projects.

Working as a team with all the parties engaged on the project — client, employer, contractors in all trades, consultants, and the local community — was a top priority. Thank you for staying the course with skill, integrity and goodness of heart.

Indeed, gentlemen, you exceeded all of the high expectations we had for you. People are coming to the school to marvel at the job you did.

Regards,

Project Director and Principal Donor

“Architectural design is not a linear process but rather a bipolar process where the function reveals through voids in a form. At times the process moves a step forward and at other times it goes backwards. This brings coherence between the form and the function. Architectural design process is therefore considered an iterative process. Mainly project focused on explore the iterative possibilities of a cube through subtraction method & to carve out an “Artists’ residency”
